

Do you enjoy nature and wildlife?

Be a citizen-scientist and attend the

Nature's Notebook Workshop

Saturday, Feb. 11, 2012
9 am - Noon

Hillsborough County Extension Office,
5339 South CR 579, Seffner, FL 33584

Your help is needed to gather information on plants and animals as part of ongoing research on the effects of climate change. Learn how to observe and record information in your own backyard or a nearby natural area, and submit your observations to an online database. You'll leave the workshop ready to join a national network of thousands of citizen-scientists providing valuable observations about how plants and animals are responding to our changing climate. Learn more about Nature's Notebook at <http://www.usanpn.org/>

Workshop is free, but registration is required

Contact Nanette at (727) 893-2765 or nanette@tbep.org to register

Nature's Notebook is a program of the National Phenology Network
